Training correctly and successfully – but how? You have already learned the basics of shooting sports and now you want to continue to improve? You want to shoot more accurately and with better focus, and you want to be more successful and well prepared when competing at a strenuous competition? Then this book is the perfect training companion for you!

All other factors being equal, it is your ability to read the wind that will make the most difference in your shooting accuracy. The better you understand the behavior of the wind, the better you will understand the behavior of your bullet. Now, champion shooters Linda K. Miller and Keith A. Cunningham reveal everything they wish they'd known about reading the wind before they started shooting (instead of having to learn as they went along) in concise, easy-to-read terms and accompanied with handy ninety-five diagrams. The Wind Book for Rifle Shooters contains straightforward guidance on the simple thought process they use to read the wind, the techniques and tactics they use to win matches, and the underlying

skills that support both. Let these champions show you how to put together a simple wind-reading toolbox for calculating wind speed, direction, deflection, and drift. Then learn how to use these tools to read flags and mirage, record and interpret your observations, and time your shots to compensate for wind. Other topics covered include: Analyzing shot placement Recording and record keeping Confidence and following your hunches And much more! The essential wind-reading basics taught in this book will absolutely improve your shooting skills, whether you're a target shooter, a plinker, a hunter or a shooting professional.

A guide to shooting profiles techniques and competitive societies associated with different types of shooting sports, and also features information on women and guns, safety, and practicing.

A surprising journey from tech support to professional marksman in front of the cameras. Chris Cheng won the title of “Top Shot,” a \$100,000 cash prize, and a professional marksman contract with the show sponsor, Bass Pro Shops. How did a tech support guy who didn't shoot a lot of guns beat out seventeen other competitors—including seasoned military veterans, law enforcement officers, and pro marksmen—in History Channel's Top Shot season 4? An excellent guide for beginning shooters, Cheng focuses on the basics and ammunition of pistols, rifles, and shotguns, marksmanship fundamentals, and buying a firearm. Other chapters include: Dry Fire Practice Firearm Accessories Safely Storing Your Firearm Cleaning and Maintaining Your Guns And much more! Additionally, Cheng covers his approach to staying calm under pressure, teamwork, sportsmanship, and leadership. These traits contributed to his coming out on top and staying above the fray. With a foreword written by Top Shot season 3 champion Dustin Ellermann and an afterword written by the original Top Shot champion Iain Harrison, Shoot to Win is sure to please shooters of all stripes, but especially fans of History Channel's program Top Shot. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Smallbore Rifle Shooting is essential reading for those who are considering taking up the sport, and for those who already have some experience but wish to improve their skills and participate in competitions. It takes the reader forward from the point at which the very first shot is fired, introduces new levels of understanding and competence, provides useful advice, and answers many of the questions frequently asked by beginners. The key topics, which are examined in detail, include

breathing, aiming, trigger control and 'follow through'. In addition, step-by-step guidance is presented on how to build a comfortable and stable prone position whilst wearing a jacket and sling. All through the book photographs, including pictures taken through the sights to show exactly what is being described, support the theory. The author also presents practice exercises that help demonstrate the different techniques. For people looking to progress beyond indoor practice shooting, there is an explanation of types of competition, how to enter events, as well as introduction to competing outdoors and learning how to anticipate the effect of the wind on a shot. Whilst other shooting books may focus on the detailed skills used by those who compete at an international level, this book offers guidance for those at the beginner to intermediate levels. Foreword by Nick Clark. Essential reading for all newcomers to the sport and offers guidance for novice up to intermediate levels. Other shooting books focus on detailed skills used by those who compete at international level. Key topics covered including breathing, aiming, trigger control and 'follow through' and step-by-step guidance to achieving a comfortable and stable prone position. Superbly illustrated with 129 colour photographs, some of these are pictures taken through the sights to show exactly what is being described. Christopher Fenning has been shooting for over fifteen years and is a qualified club instructor.

This book is the complete beginner's guide to long range shooting written in simple every-day language so that it's easy to follow. Included are personal tips and best advice from my years of special operations sniper schooling and experience, and as a sniper instructor. If you are an experienced shooter, this guide will be a resource covering the principles and theory of long range shooting. This is the preliminary book to help you understand fundamental concepts such as MOA vs Mils and external ballistics, that can be like a trusted resource at the range. Learning to shoot long range isn't that difficult. Once you understand the basics, you can start to master your technique and you'll be hitting targets in no time. The author has a series of online instructional videos known for their ability to take seemingly complex areas of long range shooting and breaking them down so that they're easy to understand. This book was motivated by the feedback from those videos. The handbook is broken down into three main categories: What it is/How it works, Fundamentals, and How to use it. "What it is/How it works" covers equipment, terminology, and basic principles. "Fundamentals" covers the theory of long range shooting. "How to use it" gives you practical advice on how to implement what you've learned so far to make you a long range shooter.
