AISC DESIGN GUIDE 25, 2011  
Edition, 2011 - FRAME DESIGN  
USING WEB-TAPERED MEMBERS.

Introduction. This document provides suggested methods for the design of web-tapered I-shaped beams and columns, as well as frames that incorporate web-tapered I-shaped beams and/or columns. Both the requirements for analysis and rules for proportioning of web-tapered framing members are addressed.

Members, developed in conjunction with Metal Building Manufacturers Association (MBMA), presents a comprehensive approach to the design of frames composed of web-tapered members within the context of the 2005 AISC Specification for Structural Steel Buildings. A preview of MBMA/AISC Design Guide 25 is presented along with an example for a typical clear-span gabled metal building frame.

One typical process is as follows: 1. Flanges and webs are cut to size or selected from plate, coil, or bar stock, and spliced as required to length. 2.

Flanges and webs are punched as required for attachments (bracing, purlin and girt bolts, etc.). 2 / FRAME
