of entrepreneurship. Entrepreneurs are widely recognized for the vital contributions they make to economic growth and general welfare, yet until fairly recently entrepreneurship was not considered worthy of serious economic study. Today, progress has been made to integrate entrepreneurship into macroeconomics, but until now the entrepreneur has been almost completely excluded from microeconomics and standard theoretical models of the firm. Gomory and Baumol show that the new and significant conflicts resulting from international trade are inherent in modern economies. The authors describe why and when this is so and why, in a modern free-trade environment, a country might have a vital stake in the competitive strength of

In this important book, William J. Baumol, Robert E. Litan, and Carl J. Schramm contend that the answers to these questions lie within capitalist economies, though many observers make the mistake of believing that "capitalism" is of a single kind.
