"Case Studies for Inclusive Schools, Fourth Edition, provides a stimulating format for understanding a variety of inclusion issues in the schools. The content focuses on problem solving from a collaborative perspective. The fourth edition provides 19 additional case studies, including a new, thought-provoking chapter that presents a group of landmark special education court cases that have impacted the lives of children and adolescents with disabilities. Teacher education students and teaching professionals can use this text to explore the different attitudes, problems, and situations that arise in the schools"--

How to raise the achievement of all kids, from gifted to those with severe disabilities This book presents lessons learned from in-depth case studies of some of our most effective inclusive public schools. The authors conclusively demonstrate that schools can educate students with mild and severe disabilities in general education classrooms by providing special education services that link to and bolster general education instruction. This goes beyond complying with Special Education law; having a truly inclusive environment raises the achievement level for all students and results in more committed and satisfied teachers. Insights shared from teachers, school leaders, parents, and the students themselves provide a path forward for anyone striving to improve special education services. The authors reveal what these exemplary schools do that makes them so successful, and provide advice for readers who want to incorporate these practices themselves. Hehir, former U.S. Office of Special Education (OSEP) Director, is a leading name in Special Education Highlights the important relationships between administrators, teachers, and parents to foster maximum collaboration between general and special education Includes information on committing to Universal Design for Learning (UDL) and Positive Behavior Supports This vital resource zeroes in on what excellent public schools do differently to ensure all students succeed.

This book features case studies from teachers, leaders and educational professors on inclusion in schools. Using a conception of inclusion that acknowledges issues of race, gender, class, sexual orientation, religion and ability, this book provides readers with a useful blend of theory and practice.

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called 'Points for Consideration.' This unique feature provides valuable insight for understanding the complexities of each case.

Over the last decade, the educational context for students with disabilities has significantly changed primarily as a result of mandates contained in NCLB and IDEA. The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective. Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed. Effectiveness is addressed within the current movement toward multi-tiered systems of support and evidence-based practices that meet the demands of high-stakes accountability.

Early childhood education has reached a level of unprecedented national and international focus. Parents, policy makers, and politicians have opinions as well as new questions about what, how, when, and where young children should learn. Teachers and program administrators now find curriculum discussions linked to dramatic new understandings about children's early learning and brain development. Early childhood education is also a major topic of concern internationally, as social policy analysts point to its role in a nation's future economic outlook. As a groundbreaking contribution to its field, this four-volume handbook discusses key historical and contemporary issues, research, theoretical perspectives, national policies, and practices. A wealth of information provides the user with up-to-date expert entries on a plethora of topics. Over three hundred entries in volumes 1, 2, and 3 cover such topics as: accountability assessment biculturalism bullying child abuse early intervention ethnicity Head Start No Child Left Behind Zero to three

The belief that regular and special education administrators should work together to create and maintain successful education programs for all students is not new, nor is the assumption that administrator preparation programs should foster the development of an inclusive approach—yet this critical educational partnership has not reached its full potential. Despite the lack of agreement within the federal legislative branch on exactly what should be changed within our education system, some promising points of consensus have emerged: competitive grants, college and career readiness, multi-tiered systems of support, common core standards, a rewards-based (rather than punitive) system for school improvement, the critical role of effective teachers and principals, increased school choice options, and evidence-based learning strategies, particularly in high-need schools. The third edition stresses the importance of these key points. Each chapter features case studies that simulate real-life situations readers are likely to encounter in their careers as administrators. Within the safety of the classroom, they will rehearse controversial scenarios involving inclusive school governance, school reform, identification and placement, conflict resolution, program evaluation, fiscal issues, transportation, and discipline. Enhanced practice situations and role-play exercises emphasize the special education administrator's role in resolving difficult situations. The case-study approach is an effective learning tool for aspiring special and regular education administrators and instructors alike, fostering enthusiastic classroom discussion and critical thinking about potential solutions to today's complex problems in inclusive educational administration.
