In order to equip hopeful graduate students with the knowledge necessary to pass the qualifying examination, the authors have assembled and solved standard and original

problems from major American universities – Boston University, University of Chicago, University of Colorado at Boulder, Columbia, University of Maryland, University of Michigan, Michigan State, Michigan Tech, MIT, Princeton, Rutgers, Stanford, Stony Brook, University of Tennessee at Knoxville, and the University of Wisconsin at Madison – and Moscow Institute of Physics and Technology. A wide range of material is covered and comparisons are made between similar problems of different schools to provide the student with enough information to feel comfortable and confident at the exam. Guide to Physics Problems is published in two volumes: this book, Part 2, covers Thermodynamics, Statistical Mechanics and Quantum Mechanics; Part 1, covers Mechanics, Relativity and Electrodynamics. Praise for A Guide to Physics Problems: Part 2: Thermodynamics, Statistical Physics, and Quantum Mechanics: "... A Guide to Physics Problems, Part 2 not only serves an important function, but is a pleasure to read. By selecting problems from different universities and even different scientific cultures, the authors have effectively avoided a one-sided approach to physics. All the problems are good, some are very interesting, some positively intriguing, a few are crazy; but all of them stimulate the reader to think about physics, not merely to train you to pass an exam. I personally received considerable pleasure in working the problems, and I would guess that anyone who wants to be a professional physicist would experience similar enjoyment. ... This book will be a great help to students and professors, as well as a source of pleasure and enjoyment." (From Foreword by Max Dresden) "An excellent resource for graduate students in physics and, one expects, also for their teachers." (Daniel Kleppner, Lester Wolfe Professor of Physics Emeritus, MIT) "A nice selection of problems ... Thought-provoking, entertaining, and just plain fun to solve." (Giovanni Vignale, Department of Physics and Astronomy, University of Missouri at Columbia) "Interesting indeed and enjoyable. The problems are ingenious and their solutions very informative. I would certainly recommend it to all graduate students and physicists in general ... Particularly useful for teachers who would like to think about problems to present in their course." (Joel Lebowitz, Rutgers University) "A very thoroughly assembled, interesting set of problems that covers the key areas of physics addressed by Ph.D. qualifying exams. ... Will prove most useful to both faculty and students. Indeed, I plan to use this material as a source of examples and illustrations that will be worked into my lectures." (Douglas Mills, University of California at Irvine)

Renowned graphic artist Jason Munn the one-man operation behind the studio The Small Stakes is a leader in modern-day music poster design. Collected here for the first time are over 150 of his iconic posters for various bands, including Beck, Wilco, Built to Spill, the Flaming Lips, the Pixies, and many more. Unique in their conceptual elegance, Munn's silk-screened posters are widely appreciated for perfectly evoking each artist or band's character and distinctive sound. With a foreword by Death Cab for Cutie's bassist Nicolas Harmer, an interview conducted by prolific poster artist Jay Ryan, and 6-color printing that showcases metallic silver and gold, this book is a beautiful celebration of art and music.

At the foot of the Elwha River, the muddy outpost of Port Bonita is about to boom, fueled by a ragtag band of dizzyingly disparate men and women unified only in their visions of a more prosperous future. A failed accountant by the name of Ethan Thornburgh has just arrived in Port Bonita to reclaim the woman he loves and start a family. Ethans obsession with a brighter future impels the damming of the mighty Elwha to harness its power and put Port Bonita on the map. More than a century later, his great-great grandson, a middle manager at a failing fish- packing plant, is destined to oversee the undoing of that vision, as the great Thornburgh dam is marked for demolition, having blocked the very lifeline that could have sustained the town. West of Here is a grand and playful odyssey, a multilayered saga of destiny and greed, adventure and passion, that chronicles the life of one small town, turning Americas history into myth, and myth into a nations shared experience.

Bubble Head is a Crested Polish Banty – One Slick Chick – and a strange-looking chicken that takes on a crafty fox in the first part of this children's adventure book. "I happen to be a stunning chicken. I allow these humans to pet my lovely feathers and tell me I'm one hot chicken, but of course I know this. It's obvious I'm a chicken worth pick-en." Whether she's strange-looking or lovely, this hip chick will delight young readers as she takes on some worthy adversaries, including a killer fox, and a large snapping spider that appears on Halloween (and if it bites, you become the spider). Does Bubble Head come out on top?
