The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Lo/Fisher is praised for its readability and conversational writing style that helps students better understand difficult concepts in Accounting. Lo/Fisher presents the how and why of reporting accounting information from within an easily-understood theoretical framework. Lo/Fisher has a clean layout that engages the reader with a clear writing style using plain English. This text is built on the current International Financial Reporting Standards (IFRS) and incorporates Accounting Standards for Private Enterprise (ASPE) where appropriate. Our philosophy is that when students understand the current standards, they will be able to analyze and interpret changes in the future. Note: You are purchasing a standalone product; MyAccountingLab does not come packaged with this content. Students, if interested in purchasing this title with MyManagementLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. A first course in accounting, this Second Edition features a contemporary focus, authoritative and professional content, computer relevancy, flexibility in coverage, and expanded treatment of managerial accounting. Serves majors and non-majors alike by providing all the basics and preparing the student for intermediate accounting and business courses. Early chapters give excellent illustrations of financial statements and provide interesting perspectives on the classical subjects. Topics include the recording process, internal control and cash, acquisition and depreciation, corporate organization and capital stock transactions, statement analysis, cost-volume-profit relationships, incremental analysis and capital budgeting, and not-for-profit accounting. Incorporates reference material on the use of computers in accounting.
