An explosion of patination methods from beginner to advanced skill levels! Patina offers a collection of over 300 metal patination recipes, application instructions, and full-sized samples for anyone working in metals, including jewelers, sculptors, and metal artisans. This all-skill-level book covers steel, stainless steel, copper, brass, bronze, silver, and aluminum. Neatly organized by metal type then by color for ease of reference. Patina discusses variables that affect the overall metal coloration such as surface preparation, chemical formula, application method, and more. Cross-references take you to the variety of patination techniques offered, including immersion, brush application, spraying, fuming, layering, using resists, hot and cold applications, and more. All recipes feature step-by-step illustrated instructions. Patina also discusses safety issues and handling and disposing of hazardous or corrosive materials as well as proper ventilation. This book is an inspirational resource, a how-to guide, and a book that you have long been waiting for.

This book will teach you how to execute a patina following step by step instructions, what to expect as you work and many factors that influence the final result. It also cover some history about patinas in antiquity and many other interesting facts about the subject of coloring bronzes.

Surface finishing is a major subject in the field of metals. The artistic and technical development of decorative or protective finishes has produced some distinctive classes of metalwork in different parts of the world. Metal Plating and Patination is the most important reference work to be published surveying the surface treatments used from the inception of metallurgy to the present day.

Describes a physical approach to metalsmithing that is informed by the natural characteristics of metal, with practical techniques and over 450 photographs.
