The cat flea, *Ctenocephalides felis*, is the most important ectoparasite of domestic cats and dogs worldwide. In addition to its annoyance to pets and humans, it is responsible for flea bite allergy dermatitis and the transmission of dog tapeworm. The abiotic and biotic factors that affect the development of immature stages are reviewed with special emphasis given to those aspects directly affecting control. Factors ...

Rangeland Ecology & Management publishes all topics-including ecology, management, socioeconomic and policy-pertaining to global rangelands. The journal's mission is to inform academics, ecosystem managers and policy makers of science-based information to promote sound rangeland stewardship. Author submissions are published in five manuscript categories: original research papers, high-profile forum topics, concept syntheses, as well as research and technical notes.

Applied research on many aspects of aquatic ecosystems. We focus on fluvial systems, from small streams to large rivers, with a particular emphasis on solving real-world conservation problems for aquatic species. Recent large projects have focused on fish migration and fish passage, life history research on migratory species, winter ecology, forest-stream interactions, and fish-mussel host-parasite ecosystems.

River ecology and management | Karlstad University

Ecology is as much a biological science as it is a human science. Human ecology is an interdisciplinary investigation into the ecology of our species. "Human ecology may be defined: (1) from a bioecological standpoint as the study of man as the ecological dominant in plant and animal communities and systems; (2) from a bioecological standpoint as simply another animal affecting and being affected by his physical environment; and (3) as a human being, somehow different from animal life in ...
