~~Head First JavaScript Programming (Book)~~

Head First: Well, give us the gist. JavaScript: Let me just say this, JavaScript was built to live in a dynamic web environment, an exciting environment where users interact with a page, where data is coming in on the fly, where many types of events happen, and the language reflects that style of programming. You'll get it a little more a bit later in the book when you understand JavaScript more. Head First: Okay, to hear you tell it, you're the perfect language. Is that right?

~~Head First JavaScript Programming by Eric Freeman~~

This isn't a bad book on JavaScript if you like the Head First approach. Its main problem is that it doesn't have a clear idea of what the average or beginning JavaScript programming is going to be doing. If you are only using JavaScript to improve a web page then you really don't need to worry too much about creating objects, only using them.
