**John Deere Engine Timing Tool - svc.edu**  
This can be especially time consuming and difficult if the engine is still mounted in the tractor. \$118.00. Description. Image Gallery. This tool is to be used for timing the oil pump to the proper rotational position, so that the distributor can then be set in its proper position. While it is possible to time the oil pump by "eye-balling" it, this tool saves a lot of time and frustration, enabling the oil pump to be properly positioned and installed, and the oil pan to be installed ...

HiSorry I was gone this weekendJohn Deere made a tool that was shaped like a Y with a long leg. the V part of the Y was placed on the crank and the long tail went directly over the center of the gear. Then you align the mark on the gear with the tail of the Y. This is done with the #1 piston at top dead center.
