Get hands-on practice with physical examination and assessment skills! Corresponding to the chapters in Carolyn Jarvis' Physical Examination & Health Assessment, 7th Edition, this lab manual offers a variety of activities, exercises, and checklists to prepare you for the skills laboratory and clinical setting. And with the new NCLEX exam-style review questions, you'll be ready to apply your knowledge and to succeed on the NCLEX exam. A variety of learning activities test your understanding with multiple-choice, short answer, fill-in-the-blank, matching, and review questions. Clinical objectives for each chapter help you study more efficiently and effectively. Regional write-up sheets familiarize you with physical examination forms and offer practice in recording narrative accounts of patient history and examination findings. Anatomy labeling exercises offer additional practice with identifying key anatomy and physiology. Narrative summary forms reflect the charting format used for narrative accounts of health history and for physical examination findings. A comprehensive glossary provides fast, easy access to key terminology and definitions. Reading assignments help you review corresponding chapters in the textbook and include page references. Audio-visual assignments tie videos of specific examination procedures to practical applications in the lab. NEW NCLEX exam-style review questions help to prepare you for the NCLEX exam. NEW evidence-based guidelines reflect a focus on conducting the most effective, qualitative exams. NEW content on the Electronic Health Record, charting, and narrative recording includes examples of how to document assessment findings.

Using a nursing-oriented, holistic approach, this straightforward text provides you with a visual presentation to conducting physical examinations. This textbook clearly delineates the routine exam techniques from those exams for special circumstances or advanced practice. UNIQUE! Routine exams and exams for advanced practice are identified with a special icon to help you quickly and easily determine essential assessment content. Body system chapters are subdivided into clearly delineated sections to allow easy navigation among these consistent sections within the chapters. UNIQUE! End-of-chapter Documentation Samples demonstrate how to document client data and provide a practice context for client charting. UNIQUE! Special feature boxes outline common, Frequently Asked Questions (FAQs) about health assessment and provide corresponding answers. Ethnic and Cultural Variations boxes present differences to anticipate among today's multicultural client population and show how to vary the exam for varied populations. Separate sections for special circumstances or special needs show how to vary the exam for clients with special needs. Feature boxes outline Healthy People 2010 objectives to provide you through discussions of recommendations for health promotion and reducing risk. Interactive Activity Lists at the end of each chapter outline corresponding exercises, checklists, and lab forms that can be found on the companion CD-ROM. Case Studies with Clinical Reasoning Questions are provided at the end of each chapter to test your application of textbook material. NCLEX exam-style review questions are included at the end of each chapter. PDF-Downloadable Exam Techniques are included on the Evolve companion website to allow you to easily access important summary exam information. UNIQUE! The 30 Core Assessment Skills identified by research as most commonly performed by nurses are now highlighted with a unique icon. UNIQUE! The companion CD-ROM now provides the Core Assessment Skills Checklists as quick step-by-step summaries for each of the 30 Core Assessment Skills. Two new chapters pull all of the essential exam and assessment content together into cohesive chapters for the infant and child and the older adult. UNIQUE! Clinical Reasoning Exemplars walk you through the thinking process of how an experienced nurse makes decisions. UNIQUE! Concept boxes feature eight concepts in the context of health assessment including pain, sleep, oxygenation, perfusion, tissue integrity, motion, sensory, and intracranial regulation.

The text combines elements of traditional Health Assessment texts with innovative elements that facilitate understanding of how best to obtain accurate data from patients.

Get the review and practice you need to master health assessment skills! Corresponding to the major chapters in Wilson & Giddens' Health Assessment for Nursing Practice, 7th Edition, this student laboratory manual guides you through an assessment lab session for each of the textbook's major topics and examination procedures. Step-by-step worksheets serve as a guide to techniques and as practice in documenting a comprehensive physical examination. New Performance Checklists ensure that you can understand and perform each assessment skill! Comprehensive guide allows you to practice assessments in the health assessment laboratory. Perforated worksheets are included for each major chapter of the Wilson & Giddens Health Assessment for Nursing Practice textbook. Dual function lets this lab manual serve as both a guide and as practice in documenting a comprehensive health assessment and physical examination. NEW! Updated content matches the new Wilson & Giddens Health Assessment for Nursing Practice, 7th Edition textbook. NEW! Performance Checklists ensure faculty that you have mastered each assessment skill.

The second edition of the Laboratory Manual is designed to accompany Jensen's Nursing Health Assessment: A Best Practice Approach. This lab manual contains exercises to help students develop clinical competency and critical-thinking skills and prepare for the NCLEX. The lab manual helps you to understand and apply the content explained in the corresponding textbook. It serves as a guide for clinical work in performing skills related to health assessment, as well as better preparing you for tests and examinations.

Both a comprehensive lab manual and a practical workbook, the Study Guide and Laboratory Manual for Physical Examination and Health Assessment 8th Edition, gives you the tools you need to master physical examination and health assessment skills. Corresponding to the best-selling Jarvis textbook, this guide features reading assignments, terminology reviews, application activities, review questions, clinical learning objectives, regional write-up sheets, and narrative summary forms, with answers at the back to facilitate both learning and review. The 8th Edition has been thoroughly updated throughout with a fresh focus on interprofessional collaboration to prepare you for the skills laboratory and interprofessional collaborative practice. Authoritative review and guidance for laboratory experiences personally written by Dr. Jarvis to give you a seamlessly integrated study and clinical experience. Consistent format throughout text includes Purpose, Reading Assignment, Terminology Review, Study Guide, and Review Questions in each chapter. Essential review and guidance for laboratory experiences familiarizes you with physical examination forms and offers practice in recording narrative accounts of patient history and examination findings. Study Guide in each chapter includes short-answer and fill-in-the-blank questions. The only full-color illustrated lab manual available for a nursing health assessment textbook enhances learning value with full-color anatomy and physiology labeling activities and more. NEW! Updated content throughout corresponds to the 8th edition of the Jarvis textbook and reflects the latest research and evidence-based practice. NEW! Enhanced integration of interprofessional collaboration exercises helps you create an SBAR report based on a brief case.
