Magura fork servicing | Singletrack Magazine Forum Magura Durin Race 100 Service Manual; I had 3 sets of various versions of Louise on a number of bikes, they were by a mile the best brakes on the market at the time; in terms of minimal maintenance, ease of bleeds when they were necessary (which wasn't often), and power. I think they still hold their own against most 2-piston brakes now. I had been a Magura guy since the early 90s on HS ...

Saline land is a resource capable of significant production. Recent advances in research in breeding for salt tolerance in wheat, biotechnology in rice, and selection and rehabilitation of salt-tolerant plants are of economic importance in arid/saline conditions. This book gives some practical approaches for saline agriculture and afforestation, and describes examples of cultivating salt-tolerant/halophytic plants for commercial interest on salt-affected land or with highly salinized water in Australia, China, Central Asia, Egypt, Pakistan, and Russia. It also explores the possibilities of arid/saline agriculture and afforestation in UAE.

Water conflicts in India have now percolated to every level. They are aggravated by the relative paucity of frameworks, policies and mechanisms to govern the use of water resources. Based on the premise that understanding and documenting different types of water conflict cases in all their complexity would contribute to informed public debate and facilitate their resolution, Forum for Policy Dialogue on Water Conflicts in India, a collaborative initiative of the WWF project 'Dialogue on Water, Food and Environment', documented a number of such case studies. One of its kind in India, this book brings together an impressive sixty-three case studies – summarized status of the conflicts, the issues involved and their current position – and gives us a glimpse into 'the million revolts' that are brewing around water. While recognizing that each conflict is a microcosm of wider conflicts, the editors have classified these cases into eight broad themes that try to capture the dominant aspect of the conflict. These are: contending water uses, dams and displacement, equity-access-allocations, micro-level conflicts, water quality, trans-boundary conflicts, privatization, sand excavation and mining. With a mix of academics and activists as contributors, the book makes an important contribution to a new discourse on water in general, and water conflicts and conflict resolution in particular.

Ampia trattazione sulle possibilità terapeutiche nell'ambito della tossicodipendenza, sia da sostanze legali che illegali (eroina, cocaina, anfetamina, cannabis). Si illustra il panorama legislativo e terapeutico europeo e mondiale, così come la prospettiva etica e futura delle diverse forme di terapia. La seconda parte del volume indaga la riduzione del danno nel campo delle droghe legali (tabacco, alcol), proseguendo poi ad analizzare il rapporto fra terapia e uso ricreativo giovanile della droga. Segue un capitolo dedicato ai problemi legali e criminali nella dipendenza e nel recupero, per poi accennare alle prospettive del recupero nell'Unione Europea.
