Masonry Beams • Reinforced masonry

Read Free Masonry Structures Behavior And Design

beams and lintels are horizontal members used to span the openings in masonry walls. • Bond beams are mostly located at floor and roof levels where their main function is:

- 1-To distribute vertical loads
- 2-To tie the elements of the building together

separately. However, even when the materials are of approximately the same nominal strength, this rule is not always reliable as there can be a difference in the lateral strains of the block and fill materials at the ultimate load, resulting in a tendency for the fill to split the block. Various formulae ...
