Moonshot: The Flight of Apollo 11 by Brian Floca is a very informational picture book. The details of the book were great along with the pictures. This book would be great to use for a lesson with space or astronomy because the information is so detailed and factual in the book. The pictures in the book give as much detail the text in the book.

Moonshot: The Flight of Apollo 11 by Brian Floca ...

Moonshot:The Flight of Apollo 11 by Brian Floca is the story of the first American manned moon landing, Apollo 11 in 1969. It's told in a simple manner and doesn't contain too many facts for young readers. The illustrations are very detailed and the story is written in poetic form.

Moonshot: The Flight of Apollo 11 by Brian Floca

Brian Floca is the author and illustrator of the acclaimed picture books Locomotive, winner of the Caldecott Medal and a New York Times bestseller; Moonshot: The Flight of Apollo 11; and Lightship, each a Robert F. Sibert Honor Book. He is the illustrator of numerous additional books, including Avi’s Poppy series.

Moonshot | Book by Brian Floca | Official Publisher Page ...

The newly revised MOONSHOT: THE FLIGHT OF APOLLO 11 is even more glorious than the original, and also more inclusive. Whereas the 2009 edition focused on the three astronauts, here there are more vignettes of the diverse men and women — white, black and brown — whose ingenuity and labor made the mission possible: the “thousands of people, / for millions of parts.”

Recreates the experiences of Neil Armstrong and Buzz Aldrin as they approach, land, and walk on the Moon, plant the American flag, collect rocks, take pictures, and finally lift off, reconnecting with their space ship, the Columbia.

New York Times bestseller for fans of First Man: A “brehtaking” insider history of NASA’s space program—from astronauts Alan Shepard and Deke Slayton (Entertainment Weekly). On October 4, 1957, the Soviet Union launched Sputnik 1, and the space race was born. Desperate to beat the Russians into space, NASA put together a crew of the nation’s most daring test pilots: the seven men who were to lead America to the moon. The first into space was Alan Shepard; the last was Deke Slayton, whose irregular heartbeat kept him grounded until 1975. They spent the 1960s at the forefront of NASA’s effort to conquer space, and Moon Shot is their inside account of what many call the twentieth century’s greatest feat—landing humans on another world. Collaborating with NBC’s veteran space reporter Jay Barbree, Shepard and Slayton narrate in gripping detail the story of America’s space exploration from the time of Shepard’s first flight until he and eleven others had walked on the moon.

On the 50th anniversary of the Apollo 11 moon landing, renowned psychologist Richard Wiseman reveals the powerful life lessons behind humanity’s greatest achievement. The historic moon landings were achieved against remarkable odds and within the space of just a few years. How can we apply the secrets of this astronomical success to our own goals, to achieve the impossible in work and in life? Psychologist Richard Wiseman brings together history, psychology, and self-help in this unique and powerful guide to achieving the impossible in work and in life. The result of intensive research, including interviews with surviving members of the Apollo mission-control team, Moonshot delivers eight key lessons on teamwork, leadership, persistence, creativity, and more, each one a vital part of the mindset for success. Filled with never-before-told stories and fresh insights, Moonshot sheds new light on the science of success—and empowers each of us to achieve the impossible.

LONGLISTED FOR THE NATIONAL BOOK AWARD • YALSA EXCELLENCE IN NONFICTION FINALIST • A ROBERT F. SIBERT HONOR BOOK This beautifully illustrated, oversized guide to the people and technology of the moon landing by award-winning author/illustrator John Rocco (illustrator of the Percy Jackson series) is a must-have for space fans, classrooms, and tech geeks. Everyone knows of Neil Armstrong’s famous first steps on the moon. But what did it really take to get us there? The Moon landing is one of the most ambitious, thrilling, and dangerous ventures in human history. This exquisitely researched and illustrated book tells the stories of the 400,000 unsung heroes—the engineers, mathematicians, seamstresses, welders, and factory workers—and their innovations and life-changing technological leaps forward that allowed NASA to achieve this unparalleled accomplishment. From the shocking launch of the Russian satellite Sputnik to the triumphant splashdown of Apollo 11, Caldecott Honor winner John Rocco answers every possible question about this world-altering mission. Each challenging step in the space race is revealed, examined, and displayed through stunning diagrams, experiments, moments of crisis, and unforgettable human stories. Explorers of all ages will want to pore over every page in this comprehensive chronicle detailing the grandest human adventure of all time!

The Caldecott Medal Winner, Sibert Honor Book, and New York Times bestseller Locomotive is a rich and detailed sensory exploration of America’s early railroads, from the creator of the “stunning” (Booklist) Moonshot. It is the summer of 1869, and trains, crews, and family are traveling together, riding America’s brand-new transcontinental railroad. These pages come alive with descriptive details of the journey: the sounds, speed, and strength of the mighty locomotives; the work that keeps them moving; and the thrill of travel from plains to mountain to ocean. Come sit inside the caboose, feel the heat of the engine, watch the landscape race by. Come ride the rails, come cross the young country!

“This behind-the-scenes look at the first Apollo moon landing has the feel of a public television documentary in its breadth and detail” (Publishers Weekly, starred review). Here is a rare perspective on a story we only thought we knew. For Apollo 11, the first moon landing, is a story that belongs to many, not just the few and famous. It belongs to the seamstress who put together twenty-two layers of fabric for each space suit. To the engineers who created a special heat shield to protect the capsule during its fiery reentry. It belongs to the flight directors, camera designers, software experts, suit testers, telescope crew, aerospace technicians, photo developers, engineers, and navigators. Gathering direct quotes from some of these folks who worked behind the scenes, Catherine Thimmesh reveals their very human worries and concerns. Culling NASA transcripts, national archives, and stunning NASA photos from Apollo 11, she captures not only the sheer magnitude of this feat but also the dedication, ingenuity, and perseverance of the greatest team ever—the team that worked to first put man on that great gray rock in the sky. Winner of the Robert F. Sibert Informational Book Award “An edge-of-your-seat adventure . . . Lavishly illustrated . . . This exhilarating book . . . will captivate.” —Chicago Sun-Times “Thimmesh gives names and voices to the army that got Neil Armstrong and company to the moon and back. The result is a spectacular and highly original addition to the literature of space exploration.” —The Horn Book “This beautiful and well-documented tribute will introduce a new generation to that triumphant time.” —Kirkus Reviews (starred review)

Instant New York Times Bestseller As the fiftieth anniversary of the first lunar landing approaches, the award winning historian and perennial New York Times bestselling author takes a fresh look at the space program, President John F. Kennedy’s inspiring challenge, and America’s race to the moon. “We choose to go to the Moon in this decade and do the other things, not because they are easy, but because they are hard; because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win.”—President John F. Kennedy On May 25, 1961, JFK made an astonishing announcement: his goal of putting a man on the moon by the end of the decade. In this engrossing, fast-paced epic, Douglas Brinkley returns to the 1960s to recreate one of the most exciting and ambitious achievements in the history of humankind. American Moonshot brings together the extraordinary political, cultural, and scientific factors that fueled the birth and development of NASA and the Mercury, Gemini and Apollo projects, which shot the United States to victory in the space race against the Soviet Union at the height of the Cold War. Drawing on new primary source material and major interviews with many of the surviving figures who were key to America’s success, Brinkley brings this fascinating history to life as never before. American Moonshot is a portrait of the brilliant men and women who made this giant leap possible, the technology that enabled us to propel men beyond earth’s orbit to the moon and return them safely, and the geopolitical tensions that spurred Kennedy to commit himself fully to this audacious dream. Brinkley’s ensemble cast of New Frontier characters include rocketeer Werhner von Braun, astronaut John Glenn and space booster Lyndon Johnson. A vivid and enthralling chronicle of one of the most thrilling, hopeful, and turbulent eras in the nation’s history, American Moonshot is an homage to scientific ingenuity, human curiosity, and the boundless American spirit.
