The recently released Tim Robbins film Cradle Will Rock reawakened worldwide audiences to composer Marc Blitzstein's runaway Broadway hit of 1937, and to the exciting times he lived in. Blitzstein went on to write Regina (based on Lillian Hellman's "The Little Foxes"), the definitive translation of Kurt Weill and Bertolt Brecht's Threepenny Opera, and an enormous amount of other music based squarely in American and Broadway traditions. Mark the Music is an engaging biography of this larger-than-life composer that reads like a novel. Practically every page features an illuminating and revealing pen portrait of the most important creative personalities in American culture--Orson Welles, John Houseman, Ernest Hemingway, Paul Robeson, Sean O'Casey, Agnes de Mille, Lotte Lenya, Melvyn Douglas, Shirley Both, Leonard Bernstein, Aaron Copland, Earl Robinson, Rudolf Bing, and many more. A vibrant journey through mid-20th century America comes to life through the eyes and experience of Marc Blitzstein. The issues that marked Blitzstein's day--censorship, repression, war--are all with us today. This is a story of passion, defiance, glory and tragedy, and ultimately of faith in democratic American values expressed through the arts.

"The Forest for the Trees should become a permanent part of any writer's or editor's personal library." -The Seattle Times Quickly established as an essential and enduring companion for aspiring writers when it was first published, Betsy Lerner's sharp, funny, and insightful guide has been meticulously updated and revised to address the dramatic changes that have reshaped the publishing industry in the decade since. From blank page to first glowing (or gutting) review, Betsy Lerner is a knowing and sympathetic coach who helps writers discover how they can be more productive in the creative process and how they can better their odds of not only getting published, but getting published well. This is an essential trove of advice for writers and an indispensable user's manual to both the inner life of the writer and the increasingly anxious place where art and commerce meet: the boardrooms and cubicles of the publishing house.

Debut albums are among the cultural artefacts that capture the popular imagination especially well. As a first impression, the debut album may take on a mythical status, whether the artist or group achieves enduring success or in rare cases when an initial record turns out to be an apogee for an artist. Whatever the subsequent career trajectory, the debut album is a meaningful text that can be scrutinized for its revelatory signs and the expectations that follow. Please Allow Me to Introduce Myself: Essays on Debut Albums tells the stories of 23 debut albums over a nearly fifty year span, ranging from Buddy Holly and the Crickets in 1957 to The Go! Team in 2004. In addition to biographical background and a wealth of historical information about the genesis of the album, each essay looks back at the album and places it within multiple contexts, particularly the artist's career development. In this way, the book will be of as much interest to sociologists and historians as to culture critics and musicologists.

In the space of a few years, Bitcoin has gone from an idea ignored or maligned by almost everyone to an asset with a market cap of more than \$12 billion. Venture capital firms, Goldman Sachs, the New York Stock Exchange, and billionaires such as Richard Branson and Peter Thiel have invested more than \$1 billion in companies built on this groundbreaking technology. Bill Gates has even declared it 'better than currency'. The pioneers of Bitcoin were twenty-first-century outlaws - cryptographers, hackers, Free Staters, ex-cons and drug dealers, teenage futurists and self-taught entrepreneurs - armed with a renegade ideology and a grudge against big government and big banks. Now those same institutions are threatening to co-opt or curtail the impact of digital currency. But the pioneers, some of whom have become millionaires themselves, aren't going down without a fight. Sweeping and provocative, How Money Got Free reveals how this disruptive technology is shaping the debate around competing ideas of money and liberty, and what that means for our future.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Who is the iconic rebel? Is it a character from the legacy of James Dean or Clint Eastwood, or maybe a Beat Generation writer? Is it a woman? Modern pop culture and the media have distorted the notion of rebellion. Classic male rebels appear sexy, nomadic-naturally rebellious-while unorthodox women are reprimanded, made to fit unrealistic roles and body images, or mocked for their decadence and self-indulgence. In order to appreciate our legacy of female rebels-and create space for future cultural icons-the notion rebellion needs to be reevaluated. From Madonna and Marilyn Monroe to the reality TV stars and hotel chain heiresses of the twenty-first century, Hellions analyzes the celebration of pop culture icons and its impact on notions of gender. Looking at these past examples, Hellions expands upon the definition of rebellion and offers a new understanding of what would be considered rebellious in the celebrity-obsessed media culture of the twenty-first century.

Factual Fictions: Narrative Truth and the Contemporary American Documentary Novel focuses on contemporary American documentary narratives, specifically the documentary novel, as it re-emerged in the 1960s and later developed into various other forms. The book explores the connections between the documentary novel and the concurrent rise of New Journalism (a.k.a. "literary journalism") in the United States, situating the two genres in the cultural context of the tumultuous 1960s and an emerging postmodern ethos. Flis makes a comprehensive analysis of texts by Truman Capote, Norman Mailer, John Berendt, and Don DeLillo, while tackling discussions on various theoretical complexities with assurance and rigor. Interested in the precarious divide between fact and fiction, the author productively complicates traditional notions of the two poles. Furthermore, the book examines parallels between contemporary Slovene documentary narratives and their American counterparts. Flis's work, with its systematic and innovative approach to the subject matter, adds an important historical dimension to the developing field of literary journalism studies as well as to the more established area of 20th Century American literature.

American Literature in Transition, 1970-1980 examines the literary developments of the twentieth-century's gaudiest decade. For a quarter century, filmmakers, musicians, and historians have returned to the era to explore the legacy of Watergate, stagflation, and Saturday Night Fever, uncovering the unique confluence of political and economic phenomena that make the period such a baffling time. Literary historians have never shown much interest in the era, however - a remarkable omission considering writers as diverse as Toni Morrison, Thomas Pynchon, Marilyn French, Adrienne Rich, Gay Talese, Norman Mailer, Alice Walker, and Octavia E. Butler were active. Over the course of twenty-one essays, contributors explore a range of controversial themes these writers tackled, from 1960s' nostalgia to feminism and the redefinition of masculinity to sexual liberation and rock 'n' roll. Other essays address New Journalism, the rise of blockbuster culture, memoir and self-help, and crime fiction - all demonstrating that the Me Decade was nothing short of mesmerizing.

Discusses gender roles, human sexuality, prejudice, discrimination, lesbian and gay politics, AIDS, gay culture, and the homosexual in literature
