Science and Religion, 1450-1900. From Copernicus to Darwin. Richard G. Olson. Galileo. Newton. Darwin. These giants are remembered for their great contributions to science. Often forgotten, however, is the profound influence that Christianity had on their lives and work. This study explores the many ways in which religion—its ideas, attitudes, practices, and institutions—interacted with science from the beginnings of the Scientific Revolution to the end of the nineteenth century.

[Amazon.co.uk:Customer reviews: Science and Religion, 1450 ...](#)

Religion and Science 1450-1900 I finished reading a book entitled Science and Religion 1450-1900 by Richard Olson, it's a great read. It frustrates the trite narratives which describe religion in great conflict with science, or that the two are antipodal, or even that the Church has been characteristically oppressive of science.

This book, the first volume in the Greenwood Guides to Science and Religion, explores the many ways in which religion—its ideas, attitudes, practices, and institutions—interacted with science from the beginnings of the Scientific Revolution to the end of the 19th century. Infused with the most up-to-date scholarship, the volume is aimed at the nonspecialist audience, explaining in clear language how inextricably linked science and religion have been during most of the last 500 years.
