Balanced and authoritative, this volume brings together leading experts to present thirteen methodologies widely used in literacy research. Following a consistent format, each chapter describes the methodology at hand, identifies the types of questions and claims for which it is well suited, de-lineates clear standards for quality, and presents one or more exemplary studies using the methodology. Studies are cited in each chapter and can be easily referenced and the chapters follow similar formats, making this an easy text to use. Guiding readers to choose wisely from available methodologies when designing their own research endeavors, and to understand the contributions that each mode of inquiry can generate - this is an essential text for graduate students in literacy. It is also an ideal resource for more experienced researchers seeking to build their skills for utilizing or evaluating particular approaches.

"Just as word learning is incremental, so is learning about vocabulary instruction. Teachers need exposure to research, best-practice strategies, and fellow practitioners." -Charlene Cobb and Camille Blachowicz The way we've learned influences the way we teach, but the vocabulary instruction many of us received-looking up words and writing sentences or completing worksheets- just doesn't work. So what can we do instead? No More "Look Up the List" Vocabulary Instruction is your guide to engaging, research-proven practices for teaching words effectively. Practitioner Charlene Cobb and researcher Camille Blachowicz share why old-fashioned methods don't work, what the research shows does work, and how to put the research into action. Charlene and Camille answer teachers' most commonly asked questions about vocabulary instruction, including: How many words, and how do I select them? How can I foster student independence using dictionaries and glossaries? How do I find time for meaningful vocabulary instruction? How can I assess and hold students accountable? "Without practice in the full range of ways we use a word," write Charlene and Camille, "our word knowledge is limited and falls from our grasp as the next cycle of words enters." No More "Look Up the List" Vocabulary Instruction offers a solution-deepen students' engagement with words, increase their exposure to them, and expand their word knowledge.

We need to play with media to become more effective communicators. This book was written to inspire and empower you, as a creative person, to expand your personal senses of digital literacy and digital agency as a multimedia communicator. As you learn to play with digital text, images, audio and video, you will communicate more creatively and flexibly with a wider variety of options. Although written primarily for educators, anyone who is interested in learning more about digital communication will learn something new from this book. As children, we learn to progressively make sense of our confusing world through play. The same dynamics apply to us as adults communicating with new and different media forms.

The Rejected Body argues that feminist theorizing has been skewed toward non-disabled experience, and that the knowledge of people with disabilities must be integrated into feminist ethics, discussions of bodily life, and criticism of the cognitive and social authority of medicine. Among the topics it addresses are who should be identified as disabled; whether disability is biomedical, social or both; what causes disability and what could 'cure' it; and whether scientific efforts to eliminate disabling physical conditions are morally justified. Wendell provides a remarkable look at how cultural attitudes towards the body contribute to the stigma of disability and to widespread unwillingness to accept and provide for the body's inevitable weakness.
