Our technical manuals can be found on oil rigs and in refineries, on cruise ships and tankers, in high street electrical products and as online help and XML in software applications.We have worked for well known multinational businesses and smaller business.

This report reviews existing hindrances to the achievement of a fully effective modern Integrated Logistic System which results from the current reliance on paper-based Technical Manuals. It proposes that realization of the full integration of Technical Information required for effective logistics support of weapon systems and other DOD hardware can be accomplished only by adoption of a system which provides for automated preparation of interactive, electronically displayed Technical Information; specifically, through DOD-wide adoption of the Interactive Electronic Technical Manual (IETM). The IETM concept is described in some detail. The advantages of IETMs in solving existing Technical Information preparation, distribution, control, and usability problems are discussed. A summary of previous analyses

and operational tests of IETM concepts is provided. Functional requirements for an IETM system capable of providing effective logistic-support guidance (e.g., training, system operation, maintenance, and supply) are discussed. The report proposes establishment of a DOD strategy to achieve a coordinated adoption of the IETM within the Services, and describes in some detail the nature of the components of such a strategy.

This performance specification prescribes the requirements for an Interactive Electronic Technical Manual Data Base (IETMDB) to he constructed by a weapon-system contractor for the purpose of creating Interactive Electronic Technical Manuals (IETM). The requirements herein cover the specification for the IETMDB and are intended to apply to one or both of two modes as specified in a contract: (1) the interchange format for the data base to be delivered to the Government; or (2) the structure and the naming of the elements of the data base created and maintained by the contractor for purposes of creating IETMs which are in turn delivered to the Government.

The purpose of this manual is to provide, in one document, guidance on acceptable workplace safety and health standards that are implemented within the Naval Air Systems Command. This manual lists NAVAIRSYSCOM Occupational Safety and Health (NAVAIROSH) requirements for NAVAIRSYSCOM shore activities. These NAVAIROSH requirements have as their specific objective ensuring that NAVAIRSYSCOM personnel, both civilian and military as NAVAIRSYSCOM shore activities, are afforded protection from occupational hazards to a degree equal to or greater than that which is required for employees in the private sector by the Occupational Safety and Health (OSH) Act of 1970.

This manual presents the technical basis for the AFSIRS model and documents the computational techniques and sources of data used in the model.

The Report summarizes recent activities in the Department of Defense and in the US Navy, Army and Air

Force to establish Service use of Interactive Electronic Technical Manuals (IETMs) as replacements for paper Technical Manuals for logistic support of military equipment. The IETM concept is described, and an overview is provided of five IETM acquisition Specifications and Military Handbooks developed by the Tri-Service Interactive Electronic Technical Manual Working Group established in 1989 by the Defense Quality and Standardization office. One of these five draft documents, MIL-M-GCSFUI, Manuals, Interactive Electronic Technical: General Content, Style, Format, and User-Interactions for, 1 June 1990, is described and presented. (Four other companion Reports have been prepared to introduce and describe the four related IETM acquisition Specifications and Handbooks.) (rh).
