“Performance Studies” gained academic prominence in departments of theater in the 1980s, then became increasingly influential in other fields. Richard Schechner, one of the founding figures of performance studies in the US, says on p. 1 of his introductory book, “anything and everything can be studied [as]”

There is very limited evidence about sports participation in relation to religion and belief in Scotland. Due to the small proportion of people in Scotland identifying with non-Christian religions, it is not possible to undertake robust analysis of trends in relation to participation in sports by religion.

Religion/ belief and sport

Religion is one which imparts culture to most of the societies. This helps them live within a set of rules unlike the animals. People tend to follow rules for marriage, work, business, death and other aspects of life. This leads to a systematic behavior by all the people in the society.

as the inter-tribal pow wow, substance abuse recovery programs such as the Wellbriety Movement, and political involvement to provide insights into contemporary Native religious identity. Simply put, this book addresses the question what does it mean to be an Indigenous American in the 21st century, and how does one express that indigeneity religiously? It proposes that practices and ideologies appropriate to the pan-Indian context provide much of the foundation for maintaining a sense of aboriginal spiritual identity within modernity. Individuals and families who identify themselves as Native American can participate in activities associated with a broad network of other Native people, in effect performing their Indian identity and enacting the values that are connected to that identity.

ways of life that motivate and inspire people. Because religious people refer to sacred texts, honour the founders of their religions, learn from elders, or mould their lives according to authoritative teachings, "Religions in Focus" explains the relationship between tradition and contemporary practice. It offers an introduction to religions that is rooted in the best scholarship of the Study of Religions and provides a secure foundation for further study. A team of Religious Studies scholars from many countries, all skilled communicators about the contemporary religions with which they are thoroughly familiar, introduce what it means to live as a religious person today. They insist that however old or young these religions may be, what is most interesting is the ways in which people express them today. This is not

The performing arts are uniquely capable of translating a vision of an ideal or sacred reality into lived practice, allowing an audience to confront deeply held values and beliefs as they observe a performance. However, there is often a reluctance to approach distinctly religious topics from a performance studies perspective. This book addresses this issue by exploring how religious values are acted out and reflected on in classic Western theatre, with a particular emphasis on the plays put

yearlong season of 'Shakespeare and the Bible'. Looking at plays such as Much Ado About Nothing, Dr. Faustus and Macbeth, each chapter includes ethnographic overviews of the performance of these plays as well as historical and theological perspectives on the issues they address. The author also utilizes scholarship from other academics, such as Paul Tillich and Martin Buber, in examining the relationship between art and culture. This helps readers of this book to look at religion in culture, and raise questions and explore ideas about how people appraise their religious values through an encounter with a performance. This book examines the connection between religion and violence in the Western traditions of the three Abrahamic faiths, from ancient to modern times. It addresses a gap in the scholarly debate on the nature of religious violence by bringing scholars that specialize in pre-modern religions and scriptural traditions into the same sphere of discussion as those specializing in contemporary manifestations of religious violence. Moving beyond the question of the "authenticity" of religious violence, this book brings together scholars from a

variety of disciplines. Contributors explore the central role that religious texts have played in encouraging, as well as confronting, violence. The interdisciplinary conversation that takes place challenges assumptions that religious violence is a modern problem that can be fully understood without reference to religious scriptures, beliefs, or history. Each chapter focuses its analysis on a particular case study from a distinct historical period. Taken as a whole, these chapters attest to the persistent relationship between religion and violence that links the ancient and contemporary worlds. This is a dynamic collection of explorations into how religion and violence intersect. As such, it will be a key resource for any scholar of Religious Studies, Theology and Religion and Violence, as well as

This volume demonstrates how, from the beginning of the Atlantic slave trade, enslaved and free Africans in the Americas used Catholicism and Christian-derived celebrations as spaces for autonomous cultural expression, social organization, and political empowerment. Their appropriation of Catholic-based celebrations calls into question the long-held idea that Africans and their descendants in the diaspora either resignedly accepted Christianity or else transformed its religious rituals into syncretic objects of stealthy resistance. In cities and on plantations throughout the Americas, men and women of African birth or descent staged mock battles against heathens, elected Christian queens and kings

with great pageantry, and gathered in festive rituals to express their devotion to saints. Many of these traditions endure in the twenty-first century. The contributors to this volume draw connections between these Afro-Catholic festivals—observed from North America to South America and the Caribbean—and their precedents in the early modern kingdom of Kongo, one of the main regions of origin of men and women enslaved in the New World. This transatlantic perspective offers a useful counterpoint to the Yoruba focus prevailing in studies of African diasporic religions and reveals how Kongo-infused Catholicism constituted a site for the formation of black Atlantic tradition. Afro-Catholic Festivals in the Americas complicates the notion of Christianity as a European tool of domination and

enhances our comprehension of the formation and trajectory of black religious culture on the American continent. It will be of great interest to scholars of African diaspora, religion, Christianity, and performance. In addition to the editor, the contributors include Kevin Dawson, Jeroen Dewulf, Junia Ferreira Furtado, Michael Iyanaga, Dianne M. Stewart, Miguel A. Valerio, and Lisa Voigt.

Social memory research has complicated the relationship between past and present because it is a relationship which finds expression in memorial acts such as storytelling and text-production. This relationship has emerged as a dialectic in which "past" and "present" are mutually constitutive and implicating. The resultant complication directly affects the

procedures and products of "historical Jesus" research, which depends particularly on the assumption that we can cleanly separate "authentic" from "inauthentic" traditions. In *Structuring Early Christian Memory* Rafael Rodriguez analyzes the problems that arise from this assumption and proposes a "historical Jesus" program that is more sensitive to the entanglement of past and present.

This volume explores the effects of the religious transformation taking place in India as sacred symbols assume the shapes of media images.

texts originate, however, literacy was confined to only a small number of educated scribes. And, as recent research has shown, even the literate scribes learned texts by repeated recitation, while the nonliterate ordinary people had little if any direct contact with written scrolls. The texts that had taken distinctive form, moreover, were embedded in a broader and deeper cultural repertoire cultivated orally in village communities as well as in scribal circles. Only recently have some scholars struggled to appreciate texts that later became "biblical" in their own historical context of oral communication.
