Picturing Will, the widely acclaimed new novel by Ann Beattie, unravels the complexities of a postmodern family. There's Will, a curious five-year-old who listens to the heartbeat of a plant through his toy stethoscope; Jody, his mother, a photographer poised on the threshold of celebrity; Mel, Jody's perfect -- perhaps too perfect -- lover; and Wayne, the father who left Will without warning and now sees his infrequent visits as a crimp in his bedhopping. Beattie shows us how these lives intersect, attract, and repel one another with dazzling shifts and moments of heartbreaking directness.

Points out how vulnerable America's energy system is to sabotage, technical failures, and natural disasters, and discusses the advantages of decentralization

This book covers the same material and more when compared with other international business texts, yet it is priced for the student's pocketbook. A new international business text for a new and ever changing global environment. With a unique chapter covering International E-Commerce, Cullen is written in a unique way. Issues link the chapters. The logic is that to choose and implement strategies in international business, you need to understand the global, institutional, and cultural environment. In turn, you need to align functional strategies to support the more general multinational strategies. From the student's point of view, the approach is designed to answer the questions of "why do I really need to know all of this stuff?" Little Book of Camper Van looks back at the development of one of the most quirky and unique vehicles to have been manufactured, and is a fascinating look at a cultural icon.

A set of creative writers here responds to the call for literature that addresses who we are by understanding where we are—where, for each of them, being somehow part of the academy. Their personal essays delineate the diverse, sometimes unexpected roles of place in shaping them, as writers and teachers in varied environments, through unique experiences and distinctive worldviews—in reconfiguring their conjunctions of identity and setting, here, there, everywhere, and in between. Offering creative comments on place, identity, and academic work are authors Charles Bergman, Mary Clearman Blew, Jayne Brim Box, Jeffrey M. Buchanan, Norma Elia Cantú, Katherine Fischer, Kathryn T. Flannery, Diana Garcia, Janice M. Gould, Seán W. Henne, Rona Kaufman, Deborah A. Miranda, Erin E. Moore, Kathleen Dean Moore, Robert Michael Pyle, Jennifer Sinor, Scott Slovic, Michael Sowder, Lee Torda, Charles Waugh, and Mitsuye Yamada.

This book deals with the interaction between strategy and human resources, as approached from a general managerial perspective. Updated and revised, the Second Edition provides students with a comprehensive overview of human resource issues applied to the most current technological advances and updated investments in employment practices. The book provides an investment perspective of human resources and covers the human resource general and legal environment, strategy formulation, planning, strategy implementation, the performance impact of human resource practices and resource evaluation. For managers and executives involved with human resource issues.

The world has witnessed extraordinary economic growth, poverty reduction and increased life expectancy and population since the end of WWII, but it has occurred at the expense of undermining life support systems on Earth and subjecting future generations to the real risk of destabilising the planet. This timely book exposes and explores this colossal environmental cost and the dangerous position the world is now in. Standing up for a Sustainable World is written by and about key individuals who have not only understood the threats to our planet, but also become witness to them and confronted them.
