A classic and expressive gag gift Doctor of Optometry or Eye Doctor. This funny College Ruled Blank Lined Paper book can be used for writing down ideas, thoughts, memories, diary, goal tracker or making notes. Perfect gift for son, daughter, cousin or a friend.

Most Optometrists don't perform medical eye services, certainly not exclusively. You can develop a successful practice while providing a much needed service by bucking this trend. Jeffrey Sedgewick, O.D., M.D. spent 4 years as a practicing Optometrist prior to entering medical school. While practicing as an Optometrist and as an Ophthalmologist, he has seen many examples of poor medical care by Optometrists, himself included. He is convinced that it doesn't have to be this way. He believes Optometrists who start their own Medical Optometry Practice can fill an increasingly important function, but they need more knowledge and clinical experience, which he seeks to provide in this textbook, in his web site [www.theodmconsultinggroup.com](http://www.theodmconsultinggroup.com), in future courses and as a consultant to your Medical Optometry Practice.

Fueled by the popular and rapidly growing ODsonFinance Facebook community of Optometrists and companion website, Co-founders Drs. Dat Bui and Aaron Neufeld created this comprehensive blueprint on techniques to overcome financial obstacles facing optometry students, residents, practicing doctors and other high-earning professionals. This book strives to teach both young and experienced optometrists financial topics that were never taught in school, ranging from strategies on how to use a high-income salary to attack massive student debt, budgeting and saving for retirement, avoiding predatory advice from financial advisers, using tax strategies to save money, creating passive income, stepping into private practice ownership and how to build wealth through long-term investing in an ever-changing optometric world. Clinical anecdotes and straightforward advice will keep students and new graduates entertained page after page while teaching important financial lessons to avoid potential pitfalls. This Book will cover topics such as: The harsh reality of Optometry and finding the right optometric career for you How to save money while in school and ways to attack student debt How to save for retirement and build wealth for the future through investing and real estate Practice ownership and creating a profitable practice Insurance and tax strategies, and when to hire professional help How to create your own side hustle Praise for the The Optometrist's Guide to Financial Freedom: "This is it! The guide that every single optometrist should be reading! Why weren't we taught this in school?!" -Dr. Angela Wong O.D "An amazing high-yielding personal finance guide for doctors and other high earning professionals! Very practical and straight to the point." -Dr. Andy Vu D.D.S. "I've been following Dr. Dat and Dr. Aaron online for a while now, and I couldn't wait to pick up their new book! The financial advice they give is very practical and easy to follow. This is a must-read for any health care professional who wants to manage their money more efficiently. Highly recommended!" -Dr. Austin Ofreneo, O.D. "The ODsonFinance guys have done a great job in teaching young doctors how to tackle the unique financial issues that plague physicians! I felt so lost and helpless before I read this and now this book is a guiding light for my future wealth-building." -Dr. Rose Wei M.D.

While the business aspect of an optometrist's practice may come second to patient care, optometrists today are faced with greater competition for new patients and income. This updated guide shows readers how to work smarter through effective practice management to offset reduced earnings due to fixed reimbursements of managed care and competition from 1-800 contact lens companies and chains selling discount frames and lenses. Drawing on over 40 years of experience, the author presents practical strategies for addressing the problems of day-to-day practice, and explains how to develop business and marketing plans without detracting from the optometrist's professional image. This edition features an increased focus on how to work with partners (including how to exit gracefully from a partnership), how to start a part-time practice, and how to be creative in practice. Authored by an expert in the field of practice management and optometry for the most effective, realistic advice and guidance. Concise, readable text synthesizes the author's 40-plus years of expertise in optometric practice. Necessary business and marketing skills are presented in a way that is compatible the optometrist's professional image. Tips and tools are provided on how to approach the client as both a consumer and a patient. Helpful information for students or optometrists who own or are planning to own their own practice. Completely re-written and updated. 4 new chapters cover topics such as practice locations, part-time practicing, managed care, management of un-met vision needs, and the office of the future. An increased focus on how to work with partners, including how to exit gracefully from a partnership. A discussion of how to start a part-time practice addresses real-world considerations and practical strategies. Hot new topics such as co-management of patients, gender and ethnicity, senior patient concerns, and discounting.

No systematic analysis of optometric clinical data can be undertaken unless the findings are referred to a logical model that allows comparisons to be made of interaction characteristics that exist between the accommodative and convergence mechanisms inherent to the human vision system. Concomitantly, many of the concepts applied during any such analytical process are based on hypothetical constructs. This text re-examines the elements originally proposed by Dr. A.M. Skellington, and offers a revised insight into how performance changes may occur as individual visual behavior adapts to the impact of environmental demands. In-depth research and extensive references attempt to substantiate the Skellington paradigm of professional vision analysis. Long-standing challenges to the optometric profession are identified. As presented, the contents are appropriate for use as a classroom text, for reference, and for identifying areas for clinical research.
